

**Cayenne Teoh**  
**Software Engineer**

Malaysian, Singapore

+65 90681491

[wanching\\_97@hotmail.com](mailto:wanching_97@hotmail.com)

## Profile

Passionate Certified AWS Solutions Architect, Software Engineer with 2+ years experience facilitating cutting-edge engineering solutions with a wide range of web application and technology skills.

Having full-stack knowledge and experience to build interactive and user-centred websites, backend DevOps experience, development-business experience, cloud computing, data analytics and project management skills.

Seeking an opportunity for the fulfillment of my passion for software engineering in a well-established organisation. Future goals would be having more involvement in various perspectives such as DevOps, project management and business development instead of a full development environment.
